

SPECIFICATION AMENDMENTS

Kindly amend the original filed specification as follows.

Please replace the paragraph beginning at page 9, line 26, with the following rewritten paragraph:

It is worth to mention that the sticker layer 30 is capable of moving along the first transparent protective layer 20 so as to selectively adjust the position of the sticker layer 30 on the treating surface of the work piece 1. It is worth to mention that when the sticker layer 30 ~~22~~ is attached on the first transparent protective layer 20, the water bubble therebetween should be pressed to release out of the sticker layer 30 so that the sticker layer 22 is fittingly overlapped on the first transparent protective layer 20 ~~second background layer 21~~.
